

St Colmcille's, Belfast

Live streaming and recordings notice

- The camera/s installed inside the church/cathedral facilitates livestreaming of masses and ceremonies from this church.
- Livestreaming allows people in hospitals or are homebound, people in nursing homes or living abroad to watch live masses, other celebrations or services and, thereby facilitating parishioners to stay connected with this parish and with their families and friends through these services.
- Church Services TV (CSTV) provides the livestreaming and recording of services. Recordings are requested **only** by the parish administrators.
- Livestreaming is 24/7 and not all livestreaming is recorded. No images are stored if a recording has not been requested.
- If services are recorded, the footage will be held securely for 30 days or otherwise as requested by the parish administrator. All recordings are stored on a secure server within the European Economic Area (EEA). Notices of recordings due to take place can be viewed daily here: <https://www.churchservices.tv/stcolmcilles> (recordings are displayed in red in the schedule) or please contact this parish for more details.
- Livestreaming and recordings can be watched from both websites <https://www.churchservices.tv/stcolmcilles> or <http://st-colmcilles.net/>
- Public recordings can be downloaded here: <https://www.churchservices.tv/stcolmcilles>
- The web camera contains a backup storage card to enable video to be accessed for security or recording purposes in the form of a backup to be recovered because of a broadband or system failure. The camera and the storage card are owned by the parish. CSTV has remote access to the footage and is accessed when requested by parish authorities. No copy leaves the church and the video is not stored elsewhere. This service can be turned off at the request of the parish.
- For further enquiries related to the services provided by CSTV please contact them here: gdpr@churchsupportgroup.com or visit www.churchservices.tv
